

Evergreen Life PHR app

Users build and share their Personal Health Record, combining NHS data with their own health insights, bridging gaps between systems.

24/7 access to NHS-assured online services

Book appointments

Order repeat prescriptions with free delivery

Set medication reminders

In-app clinically-reviewed wellbeing questionnaires and personalised tips encourage a healthy lifestyle, preventing ill-health.

Putting health in patients' hands:

- Reduces duplication
- Improves safety
- Grants access to personalised healthcare, anywhere

Data-driven approach

Our 3 million+ users can consent and contribute their secure health data to research helping to unearth discoveries and reveal trends.

People-powered data delivers personalised advice based on facts, not assumptions

Data that delivers

- Around 85% of patients using askmyGP prefer it to phoning their GP - helping to end the 8am rush
- 80% of GP requests completed same day, on average in 3 hours
- Improve practice team productivity by as much as 20%

We enable the shift from sickness to prevention

People Powered Health

Trusted by NHS GPs nationwide

3 million+ users

Helping clinicians deliver and patients enjoy better universal healthcare.

Prevention. Personalisation. Integration.

Who are Evergreen Life?

We drive wellness behaviour changes by empowering people to increase their healthy and happy years through owning their health records.

Alleviating strain on the NHS

By enabling people to make informed health decisions and contribute to research, we:

- Ease primary and secondary care system pressure
- Improve population health
- Address health inequalities

Digital-first primary care

Powering the online triage platform askmyGP, we facilitate efficiency for PCNs and ICSs using real-time data to optimise operations.

A one-stop platform for all digital clinical requirements

Clinical system write-back, coding look-up and coded patient forms

Flag cases in priority order and distribute workload across organisation

Automated patient invites

Benefits

- Reduced patient waiting times while avoiding digital exclusion
- Human-led care via message, phone and video
- Adaptive processes to match real demand while ensuring care continuity

Secondary care solutions

Helping staff balance admin and clinical time with our referral management system and ePROMs for better patient care.

Automated referral processes, tracking and reporting, easy access "plug and play"

Automatically ask patients systematic questions that they can answer online

ePROMs system alerts clinical teams to adverse events in real-time

Cost and time saving

- Fewer unnecessary follow-up appointments, saving money
- Collaboration enabled through managing complex, cross-discipline referrals within and across Trusts
- Early intervention enabled whilst reducing errors and increasing accountability
